

THE STRENGTH OF UNION

Individuals, firms and corporations will not carry accounts with the Federal Reserve Banks, but the benefits of the act are to be received by them through the member Banks (which this Bank is one) with which they may have dealings.

Heretofore, in times of stress, each Bank of necessity conserved its own resources to protect its depositors and borrowers, now the resources of each member Bank are so co-ordinated and centralized that there is no further necessity for such action, their resources being placed in a common fund, so to speak, for the benefit of the whole.

The fact that this Bank is a member of the Federal Reserve Bank of Boston is one of many reasons why we can serve you effectively and satisfactorily in your money affairs.

Tobacco, Like Food, Must Be Fresh To Be Good

Real tobacco flavor depends upon the leaf being preserved in its natural state, possible only by pressing the leaves into plug form and keeping it in by covering it with a natural leaf wrapper. The natural flavor and strength of tobacco escape when cut or granulated.

Take a Plug of Sickle that is even thoroughly dried out so that when you whittle it off it crumbles into dust, but it will burn and smoke smooth and cool as it has all of its original tobacco flavor preserved, unevaporated in Plug Form.

Whittling a pipeful is little trouble, amply repaid in both quality and quantity. Try this experiment and judge for yourself.
